Available With:

- Four-Color Process Printing
- Many Standard Ink Colors
- Multiple Security Features

Standard Security

Features Available on All Tiers:

Invisible Embedded Fibers - Only seen under black light, these fibers are embedded into the appear stock for most of our check products.

Microprint Endorsement Lines - Appearing as a solid pattern to the naked eye, these words are printed so small that they cannot be replicated by most copiers or scanners.

Thermo-chromic Icon - An icon printed in thermo-chromic ink reacts to changes in temperature.

Warning Band - A printed message that calls attention to the security features that protect the document.

Padlock Icon - An indicator to all parties accepting checks that additional security features have been incorporated, only authorized by the Check Payment Systems Association.

Diagonal Dimensional Backer - Different spacing of diagonal lines used in the check backer deter altering by cut and paste method.

High-Security

Features Vary by Tier:

Artificial Watermark - These can be viewed while holding the document at a 45-degree angle. Copiers and scanners capture images at 90-degree angles and cannot read these marks.

True Fourdrinier Watermark - A True Fourdrinier Watermark is a faint design pressed into the paper while it is being manufactured. When held to the light, these watermarks are easily visible from either side of the paper. Copiers or scanners are not capable of replicating True Fourdrinier Watermarks.

Chemical Reactive Paper - Produces a stain when activated with ink eradicator-class chemicals.

Chemical Reactive Box - When checks are printed on Chemical Reactive Paper, there is a warning box that calls the attention of the check verifier.

Hologram - Multicolored, three-dimensional image that appears in a reflective material when viewed at an angle.

Invisible Fluorescent Logo - A logo printed in invisible fluorescent ink can only be seen when viewed with a black light. Very useful for authenticating a document.

Toner Adhesion - A chemical coating that fuses the toner to the sheet thus preventing the removal of toner with tape or by scraping.

Visible Embedded Fibers - These fibers that are within the paper stock can be seen with the naked eye

Ultimate Security

Features Vary by Tier:

Unique Image-Shifting Pantograph - An image-shifting background that cannot be duplicated.

Over and Covert Fluorescent Icons - Fluorescent inks that can be seen with, and without a black light for authenticating a document.

Survivable Image - Special printing technique renders portions of the check invisible when scanned, enabling verification of original document via the stored check image.

Eagle Hologram - Multicolored, three-dimensional eagle image that appears in a reflective material when viewed at an angle.

No Envelope? No Problem

Pressure Seal

Pressure seal is an envelope-free solution that reduces multiple steps often required for reoccurring mailings, saving you both time and money.

Pressure Seal

Pressure Seal is the most efficient mailing solution. Our equipment and documents eliminate envelopes and bypass labor-intensive activities like folding, stuffing and sealing. With unlimited options for custom products and a full line of stock items, we can help you design a system that will meet your needs.

Some Benefits and Features Include:

- Saves Time and Labor
- Full Line of Stock Items
- One to Six Colors
- Any Size User or Business
- Eliminates Envelopes
- Unlimited Options for Custom Products
- High Security
- Payroll, Accounting and Direct Mail (Snap Packs)

Thermo-chromic Icon

A thermo-chromic icon is standard on all Pressure Seal checks. Thermo-chromic inks react to changes in temperature. If you touch or blow on an image printed in this ink it will disappear and then reappear after it cools. Thermo-chromic ink's reaction to temperature changes cannot be replicated on a color copier or laser printer therefore ensuring the authenticity of the document.

Pressure Seal SecureX™

An 8½" x 14" pressure seal form that makes hidden information nearly impossible to view without opening properly or destroying the form. Variable data is applied and forms are folded and sealed. The information is hidden using a unique set of glue lines around the information and a series of blockouts on multiple panels. The information is only revealed after the form is opened and a special die-cut tab is pulled back.

Useful For:

- Contests
- Grade Reports
- Test Results
- Promotions
- Billing Information
- Investment Information
- Tax Information
- Receipts
- PINs
